CONFERENCE PROGRAM

LOOKING TOWARDS THE FUTURE

BCICTS 2024 IEEE BiCMOS and Compound Semiconductor Integrated Circuits and Technology Symposium

> October 27-30, 2024 Ft Lauderdale, FL USA

Sponsored by The Electron Devices Society of The Institute of Electrical and Electronic Engineers

In Cooperation with The IEEE Solid - State Circuits Society The IEEE Microwave Theory & Techniques Society

CONFERENCE WEBSITE www.bcicts.org

WELCOME FROM THE BCICTS 2024 CHAIRS

With great pleasure we welcome you to participate in the 2024 IEEE BiCMOS and Compound Semiconductor Integrated Circuits and Technology Symposium (BCICTS). After 42 years of the Compound Semiconductor IC Symposium (CSICS), and 35 years of the Bipolar/BiCMOS Circuit and Technology Meeting (BCTM), the seventh meeting of this combined symposium will be held in person from Sunday October 27th to Wednesday October 30th at the W Fort Lauderdale, Florida, USA.

The planning committee looks forward with great anticipation at this opportunity to meet in person again, just like the last two years, after holding two BCICTS conferences virtually due to the COVID-19 pandemic. This a great opportunity for us in the engineering and technical community to reconnect with each other both professionally and personally, to meet new colleagues and visit with longtime friends, while catching up on the latest trends within microelectronics.

This year, BCICTS will continue the long history, from BCTM and CSICS, of international symposiums where distinguished experts present their latest results in bipolar, Si/SiGe BiCMOS, and compound semiconductor circuits, devices, and technology. There are no other events in the world where you can see leading edge bipolar/BiCMOS devices and technology, 5G/6G ICs, GaN HPAs, InP THz PAs, optical CMOS/SiGe transceivers, GaN HEMT power devices, advances in modeling and simulations and device physics, all presented together.

This seventh BCICTS includes presentations from worldwide submissions on all aspects of the technologies. Topics span process technology, device advances, TCAD modeling, compact modeling to IC design and testing, high-volume manufacturing, and system applications. BCICTS will also feature the very latest results in RF/microwave, millimeterwave, THz, analog & mixed signal, and optoelectronic integrated circuits.

This year, as we have done in past years, BCICTS will offer a topical short course and a more basic primer course. Both will be taught by leading experts, with the short course intended for professionals seeking comprehensive understanding of the latest industry trends and techniques, and the primer as an introductory tutorial.

We would like to thank the many dedicated volunteers on the BCICTS Committee, and the generous support of the IEEE Electron Devices, Microwave Theory and Techniques, and Solid- State Circuits Societies. Finally, we look forward to interacting with all participants to continue the traditions of technical excellence for BCICTS!

Tomislav Suligoj, Symposium Chair University of Zagreb

Breandán Ó hAnnaidh, Symposium Co-Chair Analog Devices

KEY EVENT INFORMATION

Meeting Locations:

*Registration is required for attendance

- Sunday: Short course, Studio 3
- Sunday: Primer, Studio#4
- Monday Wednesday:
- General Session: Ballroom
- Breakout: Studio 2,3,4
- Exhibition: Main Foyer
- Attendee Lounge & Speaker Ready Room: Studio 1

Conference Networking & Social Events:

Several networking events have been arranged to promote informal social interactions among conference participants. Event details are listed below for your reference:

Monday, October 28: Exhibitor Reception from 5:30 PM - 7:30 PM Location: Ballroom

Tuesday, October 29:

• Exhibitor Breakfast: 7:30 AM - 8:30 AM

• Exhibitor Luncheon: 12:30 PM - 2:00 PM Location: Ballroom Foyer

Wednesday, October 30:

• Closing Reception: 3:10 PM - 4:10 PM

Registration Desk Hours:

Sunday - Tuesday: 7:30 AM - 5:00 PM Wednesday: 7:30 AM - 4:00 PM

We're looking forward to seeing you in Fort Lauderdale, Florida!

If you have any questions, please feel free to contact Catherine Shaw:

Catherine Shaw, CMP Executive Director, Meetings and Events (BCICTS)

Phone: 732-501-3334 E-mail: cs@cshawevents.com

2024 BCICTS SCHEDULE AT A GLANCE

SUNDAY – OCTOBER 27				
SHORT COURSE How to Grow and Model High Reliability III-V Semiconductor Devices Studio 3				
7:30AM	Registration for Short Course Only			
5:00PM	Foyer			
8:00AM	Breakfast for Short Course Only			
8:45AM	Foyer			
8:45AM	Welcome & Speaker Introduction, Doug Weiser, Texas Instruments			
8:50AM	Studio 3			
8:50AM 10:20AM	III-V Epitaxial & Thin Film Deposition, Processes and Opportunities, Dr. Edwin L. Piner, Texas State University Studio 3			
10:20AM	Coffee Break for Short Course Only			
10:35AM	Ballroom Foyer			
10:35AM 12:05PM	Device and Compact Modeling of InP HBTs Dr. Markus Müller,TU Dresden, Rohde & Schwarz Studio 3			
12:05PM	Lunch Break for Short Course Only			
1:15PM	Studio 5			
1:15PM 2:45PM	Compact Modeling of GaN HEMTs Dr. Lan Wei, University of Waterloo Studio 3			
2:45PM	Adjourn and feedback			
3:00PM	Studio 3			
PRIMER Design methodologies for handheld PAs Studio 4				
7:30AM	Registration for Primer Only			
12:50PM	Ballroom Foyer			
8:00AM	Breakfast for Primer Only			
8:45AM	Ballroom Foyer			
8:45AM 8:50AM	Welcome & Speaker Introduction M Schroter, TU Dresden Studio 4			
8:50AM	Primer Lecture - Part 1, Calogero Presti, Kyocera			
11:00AM	Studio 4			
10:50AM	Coffee Break for Primer Only			
11:00AM	Ballroom Foyer			
11:10AM	Primer Lecture - Part 2, Calogero Presti, Kyocera			
12:40PM	Studio 4			
12:40PM 12:50PM	Adjourn and feedback			

2024 BCICTS SCHEDULE AT A GLANCE

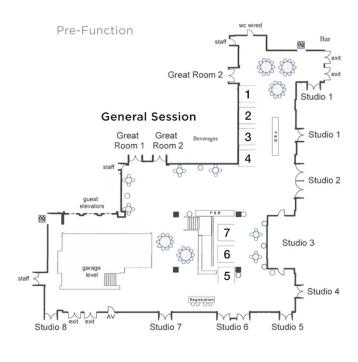

MONDAY – OCTOBER 28				
7:30AM	Registration/Continental Breakfast			
5:00PM	Foyer			
8:30AM	Welcome and Announcements			
9:00AM	Ballroom			
9:00AM	Plenary Session 1			
9:40AM	Ballroom			
9:40AM	Plenary Session 2			
10:20AM	Ballroom			
10:20AM	Sponsored Coffee Break – Qorvo			
10:50AM	Ballroom Foyer			
10:40AM 12:20PM	1a. Advances in Physics- Based HEMT Modeling Ballroom	1b. mmW Mixers and Downconverters Studio 2,3,4		
12:20PM	Lunch Break			
1:50PM	Self-Arrangement			
1:50PM 3:30PM	2a. Applications of III-V Device Modeling Ballroom	2b. mmW & THz Transceiver Technology Studio 2,3,4		
3:30PM	Sponsored Coffee Break – Texas Instrument			
4:00PM	Ballroom Foyer			
4:00PM 5:20PM	3a. High Voltage, high performance WBG devices Ballroom	3b. Ku-Band and Satellite Circuits Studio 2,3,4		
5:30PM	Exhibition Reception			
7:30PM	Ballroom Foyer			

TUESDAY – OCTOBER 29				
7:30AM 5:00PM	5	istration Foyer		
7:30AM	Exhibition Breakfast			
8:30AM	Ballroom Foyer			
8:30AM	Exhibition			
2:30PM	Ballroom Foyer			
8:30AM	4a1. SiGe Technology and Modeling Ballroom	4b. High-Performance Circuits for Optical Communications		
10:30AM	4a2. RF Reliability and TCAD to Circuits Ballroom	Studio 2,3,4		
10:30AM	Coffee Break			
10:50AM	Ballroom Foyer			
10:50AM 12:10AM	5a. Advanced Alloys and Architectures for GaN HEMTs Ballroom	5b. Low Noise Amplifiers for mmW Applications Studio 2,3,4		
12:10PM	Exhibition Lunch			
1:40PM	Ballroom Foyer			
1:40PM 3:20PM	6a. Advanced SiGe Process Technology Ballroom	6b. Novel mmW Devices & Design Techniques Studio 2,3,4		
3:20PM	Coffee Break			
3:40PM	Ballroom Foyer			
3:40PM	7a. III-V Power Amplifiers	7b. Analog ICs		
5:20PM	Ballroom	Studio 2,3,4		

2024 BCICTS SCHEDULE AT A GLANCE

WEDNESDAY – OCTOBER 30				
7:30AM	Registration/Continental Breakfast			
3:30PM	Foyer			
8:30AM 10:10AM	8a. Reliability and physics of Si/SiGe bipolars Ballroom	8b. mmW Metrology & Power Amplifier Technology Studio 2,3,4		
10:10AM	Sponsored Coffee Break – Global Foundries			
10:30AM	Ballroom Foyer			
10:30AM 11:30AM	9a. Diamond and Novel III-V Designs for High Power Ballroom	9b. Receiver Circuits Studio 2,3,4		
11:30AM	Lunch			
1:00PM	Self-Arrangement			
1:00PM	10. Late News			
2:40PM	Ballroom			
2:40PM	Closing Session			
3:10PM	Ballroom			
3:10PM	Reception			
4:00PM	Ballroom Foyer			

- 1 Virginia Diodes
 2 MPI Corporation
- 5 Keysight
- 6 StratEdge Corporation
- 3 Presidio
- 4 Maury Microwave
- 7 FormFactor

ADDITIONAL INFORMATION

REGISTRATION Complete registration information is contained in the centerfold of this booklet as well as on the conference's web page (<u>https://bcicts.org</u>) Please use the website to register. The advanced registration deadline is **September 13**. All conference activities are included in the registration fees (technical sessions, coffee breaks, Monday exhibition reception, Tuesday exhibition breakfast and Wednesday lunch

CONFERENCE SOCIAL EVENTS Several events have been arranged to promote informal social interactions among conference participants.

TUTORIAL / SURVEY TALKS Tutorial talks given by invited experts are intended to give a broad overview of a given subject with a critical review of technology and applications. They are twice the length of the usual contributed talk with longer abstracts in the Proceedings.

MEMBERS OF THE PRESS: You are welcome to attend BCICTS. Admission is free. Please email Catherine Shaw, CMP, Executive Conference Director at: <u>cs@cshawevents.com</u> for pre-registration and approval by our Executive Committee.

RECRUITING: intensive recruiting undermines the purposes for which the BCICTS was established and is contrary to IEEE policy.

BEST STUDENT PAPER AND BEST PAPER AWARDS BCICTS offers a Best Paper Award. The BCICTS Best Paper Award recognizes and promotes high quality contributions to scholarly research among professionals who author and present papers at the conference. All papers submitted in nonstudent category are eligible for consideration for the Best Paper Award.

The BCICTS Best Student Paper Award recognizes and promotes outstanding research led by students. The Best Student Paper Award the following criteria: 1) the student must have carried out a substantial part of the research reported in the paper, 2) the student must be the first author and must present the paper at the conference, 3) the paper must be identified as a student paper during submission of the paper.

Eligible papers have been evaluated by the Best Paper Award Committee and the notifications will be sent out after the conference.

OUR SPONSORS

BCICTS is sponsored by the IEEE Electron Devices Society (EDS) in co - operation with the IEEE Solid - State Circuits Society (SSCS) and the IEEE Microwave Theory & Techniques Society (MTT).

MEETINGS & SESSIONS SCHEDULE DETAILS

SUNDAY

BCICTS 2024 SHORT COURSE Studio 3

- Dr. Edwin L. Piner (Texas State University)
- Dr. Markus Müller (TU Dresden, Rohde & Schwarz)
- Dr. Lan Wei (University of Waterloo)

8:00-8:45 AM Breakfast (Primer/Short Course Only)

8:45 – 8:50 AM - Welcome & Speaker Introduction Doug Weiser, Texas Instruments

8:50 – 10:20 AM – III-V Epitaxial & Thin Film Deposition, Processes and Opportunities

Instructor: Dr. Edwin L. Piner, Texas State University

Abstract: Epitaxial and thin film formation processes on single-crystal semiconductor substrates directly enable the various elaborate III-V heterojunction device designs and, therefore, dictate the resulting electronic or optoelectronic device performance. The III-V heterojunction comprises not only the concept of varying dopant species across the junction, but more importantly, also varying the semiconductor crystals and thereby differentiates III-V device design options and concomitant performance benefits over silicon-based devices. The earliest commercially viable example is the AlGaAs/GaAs junction which exploits the energy bandgap difference to engineer charge carrier confinement. GaAs has a narrower bandgap than AlGaAs, and the AlGaAs bandgap may be 'tuned' by precisely controlling the Al composition. Several decades of research have led to the development of III-V heterojunction compounds across the entire semiconductor spectrum; B-, Al-, Ga- and In- from column-III, with N-, P-, Asand Sb- from column-V of the periodic table. This presentation will delve into the topics of III-V epitaxy and thin film deposition techniques, key process considerations, heterojunction challenges and limitations, and offer perspectives on future opportunities.

Edwin L. Piner received his Ph.D. in Material Science and Engineering from North Carolina State University in 1998. He held multiple research & development related positions in industry beginning with ATMI Corp., Epitronics division in Phoenix, AZ, then with Nitronex Corp. in Durham, NC. In 2010 he joined Texas State University's Physics department, coinciding with the launch of the Materials Science, Engineering & Commercialization Ph.D. program where he attained tenure and promotion to Professor in 2013. In addition to his Texas State faculty appointment, Dr. Piner is Chair of the Physics Department. Dr. Piner has numerous publications in the areas of wide- and ultra-wide bandgap materials and devices, is inventor on 33 US patents, and is a member of MRS, ECS and senior member of IEEE.

10:20 - 10:35 AM Break

10:35 - 12:05 PM

Device and Compact Modeling of InP HBTs

Instructor: Dr. Markus Müller, TU Dresden, Rohde & Schwarz

Abstract: High-speed Heterojunction Bipolar Transistors (HBTs) based on III-V semiconductors are highly favorable for mm-wave and sub-mm-wave applications due to their high transconductance, transit frequency (f_T) , and maximum oscillation frequency (fmax). The most advanced technologies achieve ultra-high $f_T > 500$ GHz and fmax > 1 THz, but compact and TCAD modeling for these technologies lag behind those for SiGe, necessitating further research. This lecture begins with a review of the most advanced high-speed InP HBTs and their experimental characterization. It will then compare competing III-V HBT technologies based on the InP/GaAsSb and InP/InGaAs material systems. Following this, a review of available compact models and critical effects will be provided, highlighting phenomena such as self-heating, non-quasi-static (NQS) effects, and negative differential mobility (NDM) effects. A high-level overview of the parameter extraction process will be given. Subsequently, the necessary physics and material parameters for TCAD simulation of III-V HBTs will be detailed, along with exemplary results. The session will conclude by highlighting open questions in the field.

Markus Müller earned his Master's in Electrical Engineering in 2019, followed by a Ph.D. in 2024, both from TU Dresden. In 2024, he joined Rohde & Schwarz as a device engineer in the MMIC group. His work focuses on III-V semiconductor compact and TCAD modeling, with several publications in high-impact journals. Additionally, Markus co-founded SemiMod GmbH, where he contributed to the extraction of scalable HICUM/L2 libraries for some of the world's most advanced SiGe HBT technologies.

12:05 - 1:15 PM Lunch

1:15 – 2:45 PM Compact Modeling of GaN HEMTs Instructor: Dr. Lan Wei, University of Waterloo

Abstract: With the maturing and commercial rollout of Gallium-nitride (GaN) technology, compact modeling has become an essential part of the GaN design and manufacturing ecosystem. In this short course, we start with a brief introduction of the GaN HEMT technology and the needs of compact modeling, and then discuss the general requirements for compact model and challenges for GaN modeling. A few different approaches of compact modeling will also be compared, followed by a brief introduction of the physics-based MVSG GaN HEMT compact model.

Lan Wei received her B.S. in Microelectronics from Peking University, China (2001), M.S and Ph. D. in Electrical Engineering from Stanford University, USA (2007 and 2010, respectively). She worked as a Postdoc Associate in MIT from 2010-2012 and as a Member of Technical Staff with Altera Corporation from 2012-2014. She joined University of Waterloo, Canada, in 2014, where she is currently an Associate Professor. Prof. Wei has intensive experience in device physics-based compact modeling including silicon and GaN technologies, device-circuit interactive design and optimization, integrated nanoelectronic systems with lowdimensional materials, cryogenic CMOS device modeling and circuit design for quantum computing. She was listed as one of the key contributors to the Process Integration, Devices, and Structures Chapter (PIDS) of International Technology Roadmap for Semiconductors (ITRS) 2009 Edition. She is the co-developer of the MIT Virtual Source GaN HEMT (MVSG) Compact Model, which is an Industry Standard approved and supported by the Compact Model Coalition for GaN HEMT compact model. She has authored/co-authored more than 100 peered reviewed publications and served on the technical program committees including IEDM, ICCAD, DATE, ISQED, and BCICTS etc.

2:45 – 3:00 PM – Adjourn and Feedback

BCICTS 2024 PRIMER Studio 4

Date: Sunday, October 27, 2024

Time: 8:00 AM – 12:50 PM

Topic: Design methodologies for handheld PAs

Instructor: Calogero Presti, Senior Principal Engineer, RFIC Design at Kyocera — Lecturer at UCSD (Power Amps.)

8:00 – 8:45 AM	Breakfast
8:45 – 8:50 AM	Welcome - Michael Schröter
8:50 – 11:00 AM	Primer Lecture – P1 - Calogero Presti
11:00 – 11:10 AM	Coffee Break
11:10 – 12:40 PM	Primer Lecture – P2 - Calogero Presti
12:40 – 12:50 PM	Adjourn and Feedback

The primer course is an introductory-level course on a selected topic relevant to BCICTS attendees.

Abstract:

In this course, we will delve into the fascinating world of RF power amplifiers (PAs). These essential components play a crucial role in radio transmitters and communication systems. Whether you're a seasoned engineer or just starting out, this session promises valuable insights into the heart of wireless communication.

We'll begin by reviewing the foundational characteristics of modulated signals. Understanding these properties is essential for designing efficient PAs. Signal fidelity, linearity, and distortion will be explored in the context of PA design. We will then dwell into classic PA Theory. Using an idealized transistor model, we'll develop intuition about critical PA concepts, such as loadline tuning (how to optimize the loadline for maximum power delivery), harmonic termination, strategies to improve efficiency, and the definition of the canonical Amplifier Classes (A, B, AB, C). We'll discuss the pros and cons of each amplifier class and their real-world applications.

Then we will approach Practical PA design. We will discuss Class F and J matching topologies, exploring matching networks and efficiency considerations related to second harmonic termination. Then a sample GaAs HBT PA Design will be developed. We will apply theoretical concepts to design a 2-stage PA using a simplified GaAs HBT model. Finally, an overview of advanced efficiency enhancement techniques will be given: Doherty and Envelope Tracking.

Join us for an engaging exploration of RF power amplifiers, where theory meets practical design. By the end of this primer, you'll be well-equipped to tackle real-world challenges in RF PA design and optimization.

Calogero D. Presti received the Ph.D. degree in electronics and automation engineering from the University of Catania, Italy, in 2008, working on CMOS Power Amplifiers and Silicon Photonics. During 2009 he was a postdoctoral researcher at UC San Diego, mainly working on PA digital predistortion and envelope tracking. In 2010 he joined Qualcomm Inc., San Diego, CA, where he was part of the team that started the RF Front-End business in the company. There he designed several CMOS and GaAs PAs and led some front-end module integration for sub-6GHz cellular applications. In 2019 he joined IDT (now part of Renesas) where he designed all the PAs used in mm-Wave beamformers (cellular, satcom, and radar) and occasionally supported the sub-6GHz businesses. Recently, he joined Kyocera, where he designs mm-wave power amplifiers for 5G infrastructure. Since 2017 he teaches the Power Amplifier design class at UC San Diego.

MONDAY

INTRODUCTORY REMARKS AND PLENARY

WELCOME AND ANNOUNCEMENTS

Monday, 8:30 - 9:00 AM *Ballroom* Tomislav Suligoj, Symposium Chair

PLENARY 1

Monday 9:00 AM – 9:40 AM Ballroom

Session Chair: Tomislav Suligoj, *University of Zagreb* Co-chair: Michael Roberg, *Qorvo*

Review of DARPA's T-Music Program

Todd Bauer DARPA Microsystems Technology Office

PLENARY 2

Monday 9:40 AM – 10:20 AM Ballroom

Session Chair: Michael Roberg, Qorvo Co-chair: Tomislav Suligoj, University of Zagreb

The European Chips Act

Yves Gigase Chips Joint Undertaking

CONFERENCE PROGRAM

1a. Advances in Physics-Based HEMT Modeling Monday 10:40 AM Ballroom

Session Chair: Lei Zhang, *NXP Semiconductors* Co-Chair: Subrata Halder, *Qorvo*

1a.1 (Invited)

10:40-11:20 AM – A Family of Physics-Based Models for Monolithic GaN Integration

Lan Wei1, Ryan Fang¹, Yijing Feng¹, Johan Alant¹, Ujwal Radhakrishna² ¹Department of Electrical and Computer Engineering, University of Waterloo, Waterloo, Canada ²Kilby Research Labs, Texas Instruments Inc., Santa Clara,

²Kilby Research Labs, Texas Instruments Inc., Santa C United States

1a.2 (Student) 11:20-11:40 AM – Physics-Based Compact Model for

GaN-Based Non-linear Transmission Line Resistors Johan Alant¹, Ryan Fang¹, Yuxuan Zhang², Pilsoon Choi³, Yijing Feng¹, Jessica Chong¹, Zev Pogrebin², Bin Lu², Ujwal Radhakrishna⁴, Lan Wei¹

¹University of Waterloo, Waterloo, Canada ²Finwave Semiconductor, Waltham, United States ³Massachusetts Institute of Technology, Cambridge, United States

⁴Texas Instruments, Santa Clara, United States

1a.3 (Student)

11:40-12:00 PM – A Hybrid Physical ASM-HEMT Model Using a Neural Network-Based Methodology

Rafael Perez Martinez¹, Masaya Iwamoto², Ana M. Banzer Morgado¹, Yiao Li², Roberto Tinti³, Jianjun Xu², Chad Gillease², Steven Cochran², Bhawani Shankar¹, Else-Marie Schmidt², Zijian Song³, Natalie Wagner², Philipp Pahl², Alexander Petr³, and Srabanti Chowdhury¹ ¹Department of Electrical Engineering, Stanford University, Stanford, CA USA

²Keysight Technologies Inc., Santa Rosa, CA USA³Keysight Technologies Inc., Calabasas, CA USA

1a.4

12:00-12:20 PM – Large-Signal Modeling of a 50 nm mHEMT Incorporating a Physical Impact-Ionization Model

Yasin Yüce, Sayed Ali Albahrani, Dirk Schwantuschke, Maxime Moulin, Arnulf Leuther Fraunhofer Institute for Applied Solid State Physics (IAF), Freiburg, Germany

1b. mmW Mixers and Downconverters

Monday 10:40 AM **Studio 2.3.4** Session Chair: Daniel Dong, Samsung Research America Co-Chair: Wooram Lee, Penn State University

1b.1 (Invited) 10:40-11:20 AM – N-Path Mixers Beyond CMOS Alyosha Molnar *Cornell University, Ithaca, NY, USA*

1b.2

11:20-11:40 AM – W-band GaN Resistive FET I-Q Mixer MMICs with Low Conversion Loss

Daniel Kuzmenko¹, Harris Moyer¹, Jana Georgieva¹, Tai Haw¹, Stephen A. Maas² ¹HRL Laboratories, LLC, Malibu, CA, USA ²Nonlinear Technologies, Inc., Long Beach, CA, USA

1b.3 (Student) 11:40-12:00 AM – A D-band SiGe Subharmonic Downconverter with Dynamic Conversion Gain and Fixed Input Compression

Jonathan Tao, James F. Buckwalter Department of Electrical and Computer Engineering, University of California, Santa Barbara, CA, USA.

1b.4 (Student)

12:00-12:20 AM – A Sub-Sampling 35GHz PLL in 45nm PDSOI BiCMOS with 37fs Integrated Jitter and a FoM of -252dB

Christopher Chen, Yan Zhang, Hao-Yu Chien, Jiazhang Song, Jia Zhou, Chao-Jen Tien, Sudhakar Pamarti, Chih-Kong Ken Yang, Mau-Chung Frank Chang Department of Electrical and Computer Engineering, University of California, Los Angeles, CA, USA

2a. Applications of III-V Device Modeling

Monday 1:50 PM **Ballroom** Session Chair: John Robert Jones, BAE Systems, Inc. Co-Chair: Masaya Iwamoto, Keysight Technologies

2a.1 (Invited) 1:50-2:30 PM – Practical dimensions of contemporary GaN modeling

Larry Dunleavy, Jiang Liu and Hugo Morales Modelithics, Inc., USA

2a.2 (Student)

2:30-2:50 PM – ASM-GaN Model for Resistive Mixer Applications at D-Band Frequencies

Cristina Maurette-Blasini¹, Dirk Schwantuschke², Sayed Ali Albahrani², Peter Brückner², Konstantin Kuliabin¹, Sébastien Chartier², Rüdiger Quay¹ ¹Institute for Sustainable Systems Engineering (INATECH), University of Freiburg, Germany ²Fraunhofer Institute of Applied-Solid-State Physics (IAF), Germany

2a.3

2:50-3:10 PM – Characterization and Large-Signal Modeling of 4-Pole Backgated InGaAs HEMT Antony Abel Kunnath, Sayed Ali Albahrani, Dirk Schwantuschke, Arnulf Leuther Fraunhofer IAF, Freiburg, Germany

2a.4 (Student)

3:10-3:30 PM – Small-Signal Model Verification and Analysis of Unmatched Multi-Finger HBT Cells at 220 GHz

Rob D. Jones^{1,2}, Jerome Cheron^{1,3}, Benjamin F. Jamroz¹, Ari D. Feldman¹, and Peter H. Aaen² ¹National Institute of Standards and Technology (NIST), Boulder, CO ²Colorado School of Mines, Golden, CO ³Department of Physics, University of Colorado, Boulder CO

2b. mmW & THz Transceiver Technology

Monday 1:50 PM **Studio 2.3.4** Session Chair: Marcus Pan, Semiconductor Research Corporation Co-Chair: Kazuya Yamamoto, *Mitsubishi Electric Corporation*

2b.1 (Invited) 1:50-2:30 PM – 300-GHz-Band InP HBT Power Amplifier and InP-CMOS Hybrid Phased-Array Transmitter T. Jyo¹, I. Abdo¹, H. Hamada¹, M. Nagatani¹, A. Pander¹, H. Wakita¹, M. Mutoh¹, Y. Shiratori¹, D. Kitayama¹

H. Wakita¹, M. Mutoh¹, Y. Shiratori¹, D. Kitayama¹, C.D. Gomez², C. Wang², K. Hatano², C. Liu², A. A. Fadila², J. Pang², A. Shirane², K. Okada², H. Takahashi¹ ¹NTT Device Technology Labs, NTT Corporation, Kanagawa, Japan

²Tokyo Institute of Technology, Tokyo, Japan

2b.2

2:30-2:50 PM – 300-GHz 160-Gb/s InP-HEMT Wireless Front-End with Fully Differential Architecture H. Hamada¹, I. Abdo¹, T. Tsutsumi², H. Takahashi¹ ¹NTT Device Technology Labs, NTT Corporation,

Kanagawa, Japan ²Department of Physics and Electronics, Osaka Metropolitan University, Osaka, Japan

2b.3 (Student) 2:50-3:10 PM – A Q-band Phased-Array Transmit Beamformer in 45nm CMOS SOI for SATCOM T. Ren, Y. Chang, B.A. Floyd *North Carolina State University, Raleigh, NC, USA*

2b.4

3:10-3:30 PM –Full Antenna in Package Solution for 100GHz 6G infrastructure, in 140nm SiGe BiCMOS Technology

P.H.C. Magnée¹, R. Mandamparambil¹, P. Mattheijssen¹, M. Acar¹, K. Giannakidis¹, X. Yang¹, Z. Chen¹, P. Freidl¹, J.J.T.M. Donkers¹, P.G.M. Sebel¹, I. Brunets¹, J.W. Bergman¹, D. Leenaerts¹, A. Ghannam², S. Danielsson¹, G. Bisht³, M. Lal³, W.-C. Liao⁴, O. Tageman⁴ ¹NXP Semiconductors, Eindhoven, Netherlands ²3DiS Technologies SAS, Labège, France ³Systems on Silicon Manufacturing Company, Singapore ⁴Ericsson Research, Stockholm, Sweden

3a. High Voltage, high performance WBG devices Monday 4:00 PM Ballroom

Session Chair: Martin Claus, Infineon Co-Chair: Vibhor Jain, GlobalFoundries

3a.1 (Invited)

4:00-4:40 PM – SiC High-Voltage Power Devices and High-Temperature ICs

T. Kimoto, M. Kaneko, K. Tachiki, K. Ito, K. Mikami, H. Fujii, A. Inoue, R. Ito, and N. Maeda Department of Electronic Science and Engineering, Kyoto University

3a.2 (Student) 4:40-5:00 PM – High-Temperature Stability Base Ohmic Contacts for InP/GaAsSb DHBTs

F. Ciabattini, A. M. Arabhavi, S. Hamzeloui, G. Bonomo, M. Ebrahimi, O. Ostinelli and C. R. Bolognesi *Millimeter-Wave Electronics (MWE) Group, ETH-Zürich*

3b. Ku-Band and Satellite Circuits Monday 4:00 PM Studio 2.3.4

Session Chair: Michael Litchfield, BAE Systems Co-Chair: Farooq Amin, Northrop Grumman

3b.1 (Invited) 4:00-4:40 PM – III-V Semiconductors in Commercial Communication Satellite Payloads Jim Sowers Maxar Space Infrastructure, Sunnyvale, CA, USA

3b.2 4:40-5:00 PM – A Ku-Band SiGe:C Power Amplifier with 24.8 dBm Output Power and 35.6% Peak PAE

Christian Bredendiek¹, Jan Wessel¹, Klaus Aufinger², Nils Pohl^{1,3}

¹Fraunhofer FHR, Fraunhofer Institute for High Frequency Physics and Radar Techniques FHR, Wachtberg, Germany ²Infineon Technologies AG, Neubiberg, Germany ³Institute of Integrated Systems, Ruhr-University Bochum, Germany

3b.3

5:00-5:20 PM – A compact low-loss Ku-Band 90° Hybrid Coupler for Front-End Modules in 45 nm SOI CMOS Evgenii Fedorov and Vadim Issakov

Institute for CMOS Design, TU Braunschweig, Braunschweig, Germany

TUESDAY

4a1. SiGe Technology and Modeling

Tuesday 8:30 AM **Ballroom** Session Chair: Breandán Ó hAnnaidh, Analog Devices Co-Chair: Michael Schroter, *TU Dresden*

4a1.1 (Invited) 08:30-9:10 AM – SiGe BiCMOS or FET Technologies for Wireless PA Applications

Randy Wolf, Shafi Syed, Abdellatif Bellaouar, Chi Zhang, Vibhor Jain, Rebouh Benelbar, Sujata Ghosh, Vivek Tamarkar. GlobalFoundries – Essex Junction, VT, USA GlobalFoundries – Dallas, TX, USA GlobalFoundries – Malta, NY, USA GlobalFoundries – Bengaluru, India

4a2. RF Reliability and TCAD to Circuits

Tuesday 9:30 AM **Ballroom** Session Chair: Pete Zampardi, *Qorvo* Co-Chair: Saurabh Sirohi, GlobalFoundries

4a2.1 (Invited)

9:30-10:10 AM – TCAD for Circuits and Cells: Process Emulation, Parasitics Extraction, Self-Heating

Z. Stanojevic, X. Klemenschits, G. Rzepa, F. Mitterbauer, C. Schleich, F. Schanovsky, O. Baumgartner, and M. Karner. *Global TCAD Solutions GmbH, Vienna, Austria*

4a2.2

10:10-10:30 AM – On the Safe Operating Area of InP HBTs

Markus Muller, Sebastien Fregonese, Christoph Weimer, Guangsheng Liang, Xiaodi Jin, Maximilian Froitzheim, Thomas Zimmer, and Michael Schroter. *TU Dresden, Germany IMS Laboratory, CNRS, University of Bordeaux, France* 4b. High-Performance Circuits for Optical Communications

Tuesday 8:30 AM *Studio 2.3.4* Session Chair: Munehiko Nagatani, NTT Corporation Co-Chair: Sorin Voinigescu, *University of Toronto*

4b.1 (Invited) 8:30-9:10 AM – 800 Gpbs Coherent Optical Sub-Assembly (COSA) based on Coupling Modulator Silicon Ring Resonator A. Rylyakov Nokia of America Corporation

4b.2 (Invited) 9:10-9:50 AM – Integrated Photonics in Thin-Film Lithium Niobate C. Reimer *HyperLight*

4b.3 (Student) 9:50-10:10 AM – Broadband Linear Drivers for 800G/1.6T Energy Efficient Optical Links M. Hahmud, Hal-Rubaye*, G. Rebeiz ¹University of California San Diego *Now at Broadcom, Inc.

4b.4 (Student) 10:10-10:30 AM – A 64Gb/s Si-Photonic Micro-Ring Resonator Transceiver with Co-designed CMOS Driver and TIA for WDM Optical-IO

Qianli Ma^{1,3} Sikai Chen¹, Jintao Xue^{2,3}, Yingjie Ma^{1,3}, Yuean Gu³, Chao Cheng^{2,3}, Yihan Chen³, Haoran Yin^{1,3}, Guike Li^{1,3}, Zhao Zhang^{1,3}, Nanjian Wu^{1,3}, Ke Li⁴, Lei Wang⁴, Ming Li^{1,3}, Chao Xiang⁵, Binhao Wang^{2,3}, Nan Qi^{1,3*}, Liyuan Liu^{1,3}

¹Institute of Semiconductors, Chinese Academy of Sciences, Beijing, China

²Xi⁷an Institute of Optics and Precision Mechanics, Chinese Academy of Sciences, Xi⁷an, China

³University of Chinese Academy of Sciences, Beijing, China, ⁴Peng Cheng Laboratory, Shenzhen, China

⁵The University of Hong Kong, Hong Kong, China

5a. Low Noise Amplifiers for mmW Applications Tuesday 10:50 AM Ballroom

Session Chair: Akshay Visweswaran, Nokia Bell Labs Co-Chair: Ignacio Ramos, HRL Laboratories, LLC.

5a.1

10:50-11:10 AM – A 200-250 GHz Low-Noise Amplifier in 130-nm InP HBT with 15.5 dB Gain and Record 5.3 dB Noise-Figure at 212 GHz

Amirreza Alizadeh^{#1}, Kwangwon Park^{#2}, Saleh Hassanzadehyamchi^{\$3}, Utku Soylu^{#4}, Miguel E. Urtega^{*5}, Mark J.W. Rodwell^{#6} [#]University of California, Santa Barbara, CA, USA ^{\$}University of California, Davis, CA, USA *Teledyne Scientific, Thousand Oaks, CA, USA

5a.2 (Student)

11:10-11:30 AM – A 7.7-mW DC-to-62 GHz Ultra-Wideband Low-Noise Amplifier with ±2.1 ps Group Delay Variation and 3.3 dB NF in 0.13-mm SiGe:C BiCMOS Eren Vardarli[#], Austin Ying-Kuang Chen^{\$}, Michael Schroter[#] *"TU Dresden, Germany "University of California, Santa Cruz, USA*

5a.3 (Student) 11:30-11:50 AM – A Biasing Scheme for the Gain Compression Point Optimization of HBT Cascode D-Band LNAs

Lorenzo Serra, Guglielmo De Filippi, Lorenzo Piotto, Andrea Mazzanti *University of Pavia, Italy*

5a.4 (Student)

11:50 AM-12:10 PM – A 5.6 dB NF Two-Stage 110 - 125 GHz LNA Gain-Boosted by RC-over-Neutralization for Radar Applications in 28 nm CMOS

V. Lasserre¹, S. Koop-Brinkmann¹, M. Caruso², D. Dal Maistro², G. Volpato², Q. H. Le³, T. Kämpfe³, C. Ziegler¹, F. Stapelfeldt¹, V. Issakov¹ ¹Braunschweig University of Technology, Germany ²Infineon Austria, Villach, Austria ³Fraunhofer Institute for Photonic Microsystems, Dresden, Germany

5b. Advanced Alloys and Architectures for GaN HEMTs Tuesday 10:50 AM Studio 2.3.4

Session Chair: Tim Vasen, Northrop Grumman Co-Chair: Ken Kikuchi, Sumitomo Electric

5b.1 (Invited)

10:50-11:30 AM – Characterization of ScAIN/GaN Toward Electronic Device Application

T. Maeda¹, Y. Wakamoto¹, and A. Kobayashi² ¹University of Tokyo, Tokyo Japan, ²Tokyo University of Science, Tokyo, Japan

5b.2

11:30-11:50 AM – Performance Limitations of GaN HEMTs with Quaternary InAlGaN and ScAlGaN Barrier Layers

I. Berdalovic, D. Novakovic, and T. Suligoj University of Zagreb, Zagreb, Croatia

5b.3

11:50 AM-12:10 PM – Design kit development on a 300mm GaN-on-Si demonstration platform with integrated Si pMOS

S.J. Bader1, A Zubair, A. Latorre-Rey, M. Hansen, S. Sarkar, A. Asif, D. Frolov, K. Narayanan, J. Rangaswamy, P.K. Kaur, S. Kumar, N. Kundu, S.S. Jayaprakash, A. Khobragade, P. Yashwanth, Q. Yu, J. Vasudevan, I. Momson, S. Rami, H. Vora, M. Radosavljevic, P. Koirala, M. Beumer, A. Vyatskikh, P. Nordeen, T. Hoff, N. Desai, and H.W. Then Intel Corporation, Hillsboro, OR, USA

6a. Advanced SiGe Process Technology

Tuesday 1:40 PM **Ballroom** Session Chair: Stan Phillips, *Tower Semiconductor* Co-Chair: Jack Pekarik, *GlobalFoundries*

6a.1 (Invited) 1:40-2:20 PM – A Versatile 55-nm SiGe BiCMOS Technology for Wired, Wireless, and Satcom Applications

P. Chevalier, F. Cacho, C. Durand, N. Derrier, V. Milon, F. Monsieur, A. Gauthier, H. Audouin, M. Buczko, D. Céli, C. Deglise-Favre, C. Diouf, O. Foissey, M. Hello, N. Guitard, S. Madassamy, S. Ramirez-Ruiz, C. Renard, F. Sonnerat, V. Yon, D. Gloria, G. Waltisperger St Microelectronics. Technology & Design Platforms

STMicroelectronics, Technology & Design Platforms, Crolles, France 6a.2 2:20-2:40 PM – Towards 500GHz f_{MAX} 140nm SiGe BiCMOS Technology for 5G/6G Applications J.P. John¹, J. Kirchgessner¹, J.J.T.M. Donkers¹, P.H.C. Magnée¹, P.G.M. Sebel¹, R. Werkman¹, G. Anderson¹, I. Brunets¹, P.K. Uttwani², Mohamed G. Moinuddin², L. Radic¹, I. To¹, T.H. Both¹ ¹NXP Semiconductors ²Systems on Silicon Manufacturing Company

6a.3 (Student)

2:40-3:00 PM – High-Performance SiGe Heterojunction Phototransistor in a Commercial SiGe BiCMOS Platform for Free-Space Optical Receivers

Mozhgan Hosseinzadeh¹, Milad Frounchi¹, George N. Tzintzarov^{1*}, Jeffrey W. Teng¹, and John D. Cressler¹ ¹Georgia Institute of Technology *Now at The Aerospace Corporation

6a.4

3:00-3:20 PM – Practical Simulation and Test Strategies for Advanced Heterojunction Bipolar Transistors Adam W. DiVergilio *GlobalFoundries, Essex Junction*

6b. Novel mmW Devices & Design Techniques Tuesday 1:40 PM Studio 2.3.4

Session Chair: Harris Moyer, HRL Laboratories, LLC. Co-Chair: TBD.

6b.1 (Invited)

1:40-2:20 PM – D-Band meets FinFET: Fully-Integrated Transmitter and Receiver Architectures for 100+Gb/s Links

Steven Callender, Abhishek Agrawal, Amy Whitcombe, Ritesh Bhat, Stefano Pellerano Intel Labs, Intel Corporation, Hillsboro, OR USA

6b.2 (Student)

2:20-2:40 PM – A 132-204 GHz Carrier Storage Frequency Divider with sub-50 Micro-Watt DC Power Sidharth Thomas, Benyamin Fallahi Motlagh,

Aydin Babakhani University of California, Los Angeles, USA

6b.3

2:40-3:00 PM – A Novel Approach to Zero Ω Transmission Line Analysis and Design at W-Band and Beyond

Israel Tapia, Eren Vardarli, Ciro Esposito and Michael Schröter Technische Universität Dresden, Germany

6b.4 (Student) 3:00-3:20 PM – A 10 Gb/s, 120 GHz Compact and Energy-Efficient Harmonic-OOK (HOOK) Modulator using 90 nm SiGe BiCMOS

Shah Zaib Aslam¹ and Najme Ebrahimi² ¹Department of Electrical and Computer Engineering, University of Florida, Gainesville, FL, USA ²Department of Electrical and Computer Engineering, Northeastern University, Boston, MA, USA

7a. III-V Power Amplifiers

Tuesday 3:40 PM **Ballroom** Session Chair: Kazuya Yamamoto, *Mitsubishi Electric Corp.* Co-Chair: David Wohlert, *Qorvo*

7a.1 (Invited) 3:40-4:20 PM – Load-Modulated Balanced Amplifiers for Next-G Wireless Communications

Pingzhu Gong, Jiachen Guo, and Kenle Chen Department of Electrical and Computer Engineering, University of Central Florida, USA

7a.2

4:20-4:40 PM – Ka-Band, Reactively Matched Non-Uniform Distributed Power Amplifier MMICs in GaN-on-SiC

Michael Litchfield, Qin Shen-Schultz, and Bernard Schmanski BAE Systems, Nashua, NH, USA

7a.3 (Invited)

4:40-5:20 PM – Advances in GaN HEMT and GaN Power Amplifier Techniques for Base-Stations Bernhard Grote, David Yu-Ting Wu, Bruce Green,

Raphael Holin, David Burdeaux, Philippe Renaud, Humayun Kabir, and Patrick Hu NXP Semiconductors, Chandler, Arizona, USA

7b. Analog ICs Tuesday 3:40 PM Studio 2.3.4 Session Chair: Sri Navaneeth Easwaran, Texas Instruments Co-Chair: Jack Pekarik, GlobalFoundries

7b.1 (Invited)

3:40-4:20 PM – High-Efficiency High-Conversion-Ratio **Power Delivery Circuits for Computing Applications** Hoi Lee¹, Chen Chen¹, Weijie Han¹, Atul Sudha¹, Sri Navaneeth Easwaran² Jin Liu¹

¹UT Dallas, Texas. ²Texas Instruments, Dallas, TX

7b.2 (Student)

4:20-4:40 PM – A Single-Stage 24 Gb/s 8:1 Cryogenic Multiplexer for Josephson Arbitrary Waveform Synthesizer

Yerzhan Kudabay¹, Paul Julius Ritter², Vadim Issakov¹ ¹Institute for CMOS Design, TU Braunschweig, Braunschweig, Germany ²Institute for Electrical Measurement Science and Fundamental Electrical Engineering, Technical University Braunschweig, Braunschweig, Germany

7b.3 (Student)

4:40-5:00 PM – A Direct Digital Synthesizer-based Arbitrary Waveform Generator for Envelope Modulation in Trapped-Ion Quantum Computer Operating at 4K

Paul Shine Eugine¹, Peter Toth¹, Kaoru Yamashita², Sebastian Halama³, Christian Ospelkaus³, Hiroki Ishikuro², Vadim Issakov¹

¹Institute for CMOS Design, TU Braunschweig, Braunschweig, Germany

²Ishikuro Laboratory, Keio University, Yokohama, Japan ³Institute of Quantum Optics, Leibniz University, Hannover, Germany

7b.4 (Student)

5:00-5:20 PM – A Low-Power, High-Swing LDMOS Driver Amplifier for Shuttling Controller in a Trapped-Ion Quantum Computer Operating at 4K

Zhaoqun Guo¹, Alexander Meyer¹, Adilet Dossanov¹, Paul Julius Ritter², Marius Neumann², Jens Repp³, Matthias Brandl³, Meinhard Schilling², Vadim Issakov¹ ¹Institute for CMOS Design, TU Braunschweig, Braunschweig, Germany

²Institute for Electrical Measurement Science and Fundamental Electrical Engineering, TU Braunschweig, Braunschweig, Germany ³Infineon Technologies AG, Neubiberg, Germany

WEDNESDAY

8a. Reliability and physics of Si/SiGe bipolars

Wednesday 8:30AM **Ballroom** Session Chair: Kai Kwok, Skyworks Co-Chair: Jonggook Kim, Texas Instruments

8a.1

8:30-8:50 AM – High Temperature Annealing induced recovery of Hot-Carrier degradation in High Performance NPN SiGe HBTs

Dimitris P. Ioannou and Adam DiVergilio *GlobalFoundries, USA*

8a.2 (Student)

8:50-9:10 AM – Using Pulsed-Mode Measurements of SiGe HBTs for Non-Destructive, Improved RF-SOA Estimation

Nelson E. Sepúlveda-Ramos, Harrison P. Lee, Jeffrey W. Teng, and John D. Cressler School of Electrical and Computer Engineering, Georgia Institute of Technology, Atlanta, GA 30332-0250 USA

8a.3 (Student)

9:10-9:30 AM – The Effect of Base Doping Profile on Horizontal Current Bipolar Transistor's (HCBT) Beta Recovery at Cryogenic Temperatures

Filip Bogdanović¹, Lovro Marković¹, Azra Tabaković¹, Josip Žilak², Marko Koričić¹ and Tomislav Suligoj¹ ¹University of Zagreb, Faculty of Electrical Engineering and Computing, Micro and Nano Electronics Laboratory, Zagreb, Croatia

²Ericsson Nikola Tesla d.d., Zagreb, Croatia

8a.4

9:30-9:50 AM – On the Emitter Back-Injection Current in Advanced SiGe HBTs at Cryogenic Temperatures

Xiaodi Jin, Prateek Kumar, and Michael Schröter Chair for Electron Devices and Integrated Circuits, Technische Universität Dresden, Germany

8a.5 (Student)

9:50-10:10 AM – TCAD-Based Design of SiGe HBT Germanium Profiles via Bayesian Optimization Justin P. Heimerl, Jeffrey W. Teng, Harrison P. Lee, Delgermaa Nergui, Jackson P. Moody, and John D. Cressler

School of Electrical and Computer Engineering, Georgia Institute of Technology, Atlanta, GA 30332-0250 USA

8b. mmW Metrology & Power Amplifier Technology

Wednesday 8:30AM *Studio 2.3.4* Session Chair: Harris Moyer, HRL Laboratories, LLC. Co-Chair: Utku Soylu, IBM T.J. Watson Research Center

8b.1 (Invited) 8:30-9:10 AM – Trends in Millimeter-Wave and THz Test Equipment Eric Bryerton, Jeffrey Hesler Virginia Diodes, Inc., Charlottesville, VA, USA

8b.2 (Student)

9:10-9:30 AM – A D-band Power-Combined Stacked Common-Base Power Amplifier Achieving 20.9 dBm Psat and 24.3 % PAE in a 250-nm InP HBT Technology Arno Hemelhof^{*†}, Sehoon Park[‡], Yang Zhang^{*}, Mark Ingels^{*}, Giuseppe Gramegna^{*}, Kristof Vaesen^{*}, Dongyang Yan^{*†}, Piet Wambacq^{*†}

*imec, Leuven, Belgium
†Vrije Universiteit Brussel, Dept. of Electronics and Informatics (ETRO), Brussels, Belgium
‡now with Kyungpook National University, School of Electronics Engineering, Daegu, Republic of Korea

8b.3 (Student) 9:30-9:50 AM – A Two-stage, Two-way-combined, 220-GHz Power Amplifier With 17.1% PAE in a 250-nm InP HBT Process

Eythan Lam[#], Jeff Shieh-Chieh Chien^{#\$}, Petra Rowell^{*}, Miguel Urteaga^{*}, James Buckwalter[#] [#]University of California, Santa Barbara, USA ^{\$}Samsung Semiconductor, Inc., San Jose, USA ^{*}Taleduna Saintifia and Imaging, Thousand Oaka, USA

*Teledyne Scientific and Imaging, Thousand Oaks, USA

8b.4 (Student) 9:50-10:10 AM – 10-GSymbols/s Supply Modulated 250-GHz SiGe HBT Transmitter RF Front-End with 6.8-dBm Peak Modulated Power

Haidong Guo¹, Suprovo Ghosh¹, Frank Zhang¹, Suhwan Lee¹, Wooyeol Choi², Shenggang Dong¹, Kenneth O¹ ¹University of Texas at Dallas, Richardson, TX, USA ²Seoul National University, Seoul, Korea

9a. Diamond and Novel III-V Designs for High Power

Wednesday 10:30 AM **Ballroom** Session Chair: Kanin Chu, *BAE Systems* Co-Chair: Takuya Hoshi, *NTT*

9a.1 (Invited) 10:30-11:10 AM – Diamond-BN Heterojunctions for High Power Devices: The Ultimate HEMT? T. Thornton

Arizona State University, Tempe, AZ USA

9a.2

11:10-11:30 AM – Exploring Breakdown Voltage Improvement in 20-nm InGaAs-Channel HEMT-OI with Metallic Back-Gate

A. A. Kunnath, M. Moulin, S. A. Albahrani, D. Schwantuschke, and A. Leuther *Fraunhofer IAF, Freiberg, Germany*

9b. Receiver Circuits

Wednesday 10:30 AM *Studio 2.3.4* Session Chair: Gregory Flewelling, *BAE Systems* Co-Chair: Django Trombley, *TI*

9b.1

10:30-10:50 AM – A 19.1-dBm-Linear 2-20 GHz N-path Down-converter in HRL 40-nm GaN for Resilient Receivers Robin Ying and Joe Tai

HRL Laboratories LLC, Malibu, CA, USA

9b.2

10:50-11:10 AM – Single-Chip 30 GHz SiGe Sub-Sampling PLL with 28.3 fs Jitter

Dimitre Dimitrov, Mark D. Hickle, Matthew Speir, Joseph M. Krzyzek, Daniel P. Lacroix, Shail Srinivas, Robert Sepanek, Spencer Desrochers, and Steven Eugene Turner *BAE Systems, Merrimack, NH, USA*

9b.3 (Student) 11:10-11:30 AM – Design of an Ultra-Low Phase Noise Broadband Amplifier in 130 nm SiGe BiCMOS Technology

Vijayalakshmi Surendranath Shroff, Meysam Bahmanian, Stephan Kruse, and J. Christoph Scheytt Paderborn University, Department of Electrical Engineering, Heinz Nixdorf Institute, Germany

<u>10. Late News</u>

Wednesday 1:00 PM **Ballroom** Session Chair: Jack Pekarik, GlobalFoundries Co-Chair: TBD

10.1 (Student) 1:00-1:20 PM – Design of a Terahertz InP HBT Quadrupler and Silicon Interposer

Quadrupler and Silicon Interposer Vinay Iyer^{1,2}, Christopher Moore², Prerana Singaraju², Matthew F. Bauwens³, Steven M. Bowers², Robert M. Weikle² ¹Nokia of America Corporation, Sunnyvale, CA, USA

²University of Virginia, Electrical and Computer Engineering, Charlottesville, VA, USA

³Dominion Microprobes, Charlottesville, VA, USA

10.2 (Student) 1:20-1:40 PM – A 130-GHz Bandwidth 61-dBOhm Variable-Gain Differential Linear TIA in a 130-nm SiGe:C BiCMOS Technology

Thiemo Herbel¹, Mohsin Tarar², Frank Vater³, Dietmar Kissinger¹ ¹Institute of Electronic Devices and Circuits, Ulm University, Ulm, Germany ²Department of Electronics Engineering, University of Chakwal, Chakwal, Pakistan ³Leibniz Institute for High Performance Microelectronics (IHP), Frankfurt (Oder), Germany

10.3

1:40-2:00 – 140-GHz Transmit and Receive Front-end Circuits with 10.8-dBm Psat and 5.9-dB NF in a 45-nm BiCMOS SOI Process

Wonho Lee, Everett O'Malley, James Buckwalter Electrical & Computer Engineering, UC Santa Barbara, Santa Barbara, CA

10.4

2:00-2:20 – The Design of Wideband LNAs in 45nm SiGe BiCMOS

David Dolt¹, Mingi Yeo¹, David Reents¹, Will Gouty², Tony Quach², Samuel Palermo¹ ¹Texas A&M University, Analog and Mixed-Signal Center, College Station, TX, USA ²Air Force Research Laboratory, Sensors Directorate, WPAFB, OH, USA

10.5 (Student)

2:20-2:40 – Ka-Band MMIC Implementation of a Load-Modulating Loop Combiner Power Amplifier Osian Jones, Taylor Barton *RF Power and Analog Laboratory, University of Colorado Boulder, Boulder, CO, 80309 USA*

SYMPOSIUM EVENT MANAGEMENT

Catherine Shaw John Hinch Jessica Lotito Jim Skowrenski Sherry Russ Sills Kristen Macarthur

C.Shaw, LLC Omnipress IEEE Electron Devices Society IEEE Electron Devices Society IEEE Meetings, Conferences and Events IEEE Meetings, Conferences and Events

LOOKING TOWARDS THE FUTURE

The 2025 IEEE BiCMOS and Compound Semiconductor Integrated Circuits and Technology Symposium (BCICTS) will be held on October 12-15, 2025 Scottsdale, Arizona, USA

INTEGRATED CIRCUITS and DEVICES in GaAs, InP, GaN, SiGe, and other compound semiconductor and CMOS technologies

Sponsored by the IEEE Electron Devices Society, co-sponsored by the Solid-State Circuits Society and the Microwave Theory & Techniques Society

CALL FOR PAPERS

The 2025 BCICTS will be held in Scottsdale, Arizona, USA from October 12-15, 2025. Subject area groupings for paper submissions are as follows:

HIGH-SPEED DIGITAL, MIXED-SIGNAL, AND OPTOELECTRONIC ICs Mixed analog/digital ICs - Digital ICs - (high-speed) DACs and ADCs - Networking ICs, MUX/DEMUX, Clock and data recovery, Decision circuits, Equalizers - Optical data links, Laser and modulator drivers, optoelectronics and photonics ICs

ANALOG, RF, AND MICROWAVE ICs

Op amps - Voltage references and regulators - Integrated filters -Sensors and actuators - RF circuits and systems - Radio and transceiver subsystems - LNAs - AGCs - Mixers - Voltage controlled oscillators - Frequency synthesizers - Power amplifiers - RF switches - Noise and distortion suppression - RF Packaging - Integrated RF passives. Analog, RF, power conversion, High-voltage ICs -Biomedical electronics - Power Management ICs - Energy harvesting ICs - Motor controls - Analog subsystems within a VLSI chip -Packaging of high-performance ICs.

mm-WAVE AND THZ ICs

Millimeter - wave circuits and systems - THz circuits and systems. MM-Wave switches and amplifiers. Phased-array antenna circuits

DEVICE PHYSICS:

New device physics phenomena in Si, SiGe, SiC, GaN, MOS, and III-V HBTs and FETs - Device design issues and scaling limits - Hot electron effects and reliability physics - Transport and high field phenomena - Noise - Linearity/Distortion - Novel measurement techniques - Operation in extreme environments (low/high temperatures, radiation effects), and ESD phenomena.

MODELING AND SIMULATION

Improved silicon-based BJT and HBT models and physics-based modelling techniques - Improved III-V HBT and FET models and physics-based modelling techniques - Parameter extraction methods and test structures - High-frequency measurement, calibration and deembedding techniques - RF and thermal simulation techniques - Modelling of passives, interconnect and packages - Statistical modelling - Device, process and circuit simulation - CAD/modelling of power devices.

PROCESS AND DEVICE TECHNOLOGY

Device and IC manufacturing processes, testing methodologies, & reliability - Integration of III-V devices on Si - High performance devices such as GaN power conversion devices - near-THz SiGe HBTs & InP HEMTs - Novel devices such as tunnel FETs (TFETs) carbon nanotubes, MEMS, graphene & diamond transistors. Optoelectronic and photonic devices such as optical modulators, lasers, photodetectors, and Silicon Photonics - Thermal management technologies, thermal simulation - Advanced packaging of high-power devices and ICs. Advances in processes and device structures demonstrating high speed, low power, low noise, high current, high voltage, etc. BiCMOS processes - Advanced process techniques - Si homojunction bipolar/BiCMOS devices and and SiC SiGe heterojunction bipolar/BiCMOS devices - Manufacturing solutions related to Bipolar and BiCMOS yield improvements - Fabrication of high-performance passive components, sensors, and MEMs -Process technology related to discrete and integrated bipolar/BiCMOS power devices - IGBT, RF power devices. Wide bandgap bipolar devices (e.g., SiC) and related process technology - 3D Integration -Reliability and testing for IC manufacturing

IMPORTANT DATES Friday May 9, 2025 – Abstracts Due Friday, July 11, 2025 – Decision E-mail Sent Friday, September 5, 2025 – Final Manuscript Due

Authors must submit an abstract (not more than 4 pages including figures and other supporting material) of results not previously published or not already accepted by another conference. Papers will be selected on the basis of the abstract.

The abstract must concisely and clearly state:

- a) The purpose of the work
- b) What specific new results have been obtained
- c) How it advances the state-of-the-art or the industry
- d) References to prior state-of-the-art
- e) Sub-committee preference:
 - Analog, RF, and Microwave ICs
 - Device Physics
 - High-Speed Digital, Mixed-Signal, & Optoelectronic ICs
 - Modeling & Simulation
 - mm-Wave and THz ICs
 - Process & Device Technology

Abstracts must include: title, author(s) name(s) and affiliation(s), corresponding authors' postal and e-mail addresses, and telephone numbers. The committee will honor the authors' committee preference but reserves the right to review the paper in other categories.

Company and governmental clearances must be obtained prior to submission of the abstract.

Accepted work may be used for publicity purposes. Portions of the abstracts may be quoted in articles publicizing the Symposium. Please note on the abstract if this is not acceptable.

Abstracts (PDF only) must be submitted electronically.

Authors will be informed of a decision by July 11, 2025. Authors of accepted papers are required to submit a 4-page camera-ready PDF by September 5, 2025 for inclusion in the Symposium Digest.

Further questions on abstract submission may be addressed to the Symposium Technical Chair:

Michael Roberg Technical Director, MMIC Design Qorvo, Inc. Email: michael.roberg@qorvo.com

Symposium information, including abstract submission instructions and a link to the abstract submission system will be available on the BCICTS website at: <u>http:// www.bcicts.org</u> in the near future.

QOUND

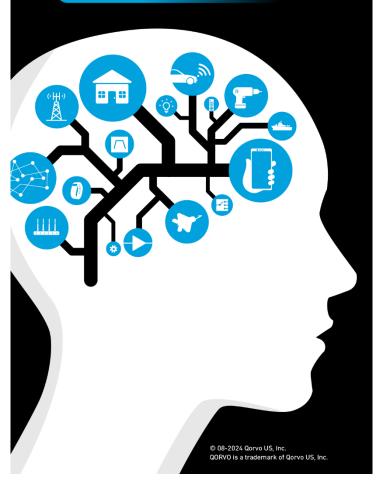

Brilliant Mind?

Solve the most complex RF and power design challenges at Qorvo.

Join Qorvo's world-class engineers and make a future in RF and power technology.

qorvo.com/careers

Building the next era of semiconductor manufacturing

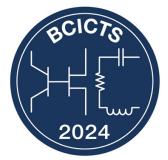

We have a long history of globally owned, regionally diverse internal manufacturing operations, including wafer fabs, assembly and test factories, and bump and probe facilities across 15 worldwide sites. We manufacture tens of billions of analog and embedded processing semiconductors annually, across more than 80,000 different products, and deliver them to more than 100,000 customers around the globe.
